

AN ANCIENT NAME FOR THE MOST MODERN ELECTRIC BIRD REPELLENT

#### TENSIONER

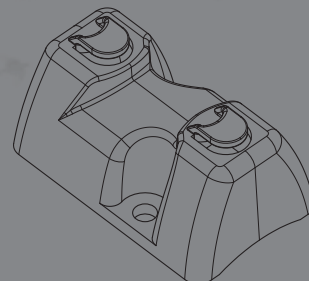

Allows you both to block/stretch the wire quickly and to make the line cord.  
Use: every beginning and end of the line with cable  $\varnothing$  1 mm. However, it is recommended every 30-50 meters at least.

#### INSULATOR

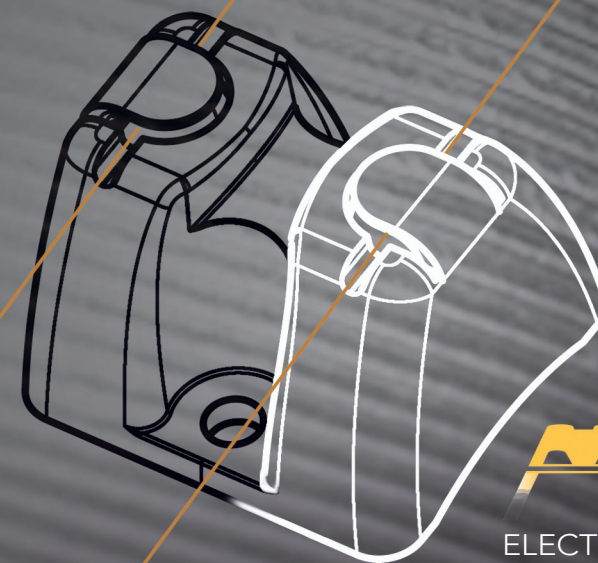

Support for 1 and 2 mm wires.  
Use: 1 per meter or at inclination changings. They can be also glued.

#### CORNER

Support for 1 and 2 mm wires.  
Use: To make angles from  $90^\circ$  to  $170^\circ$  - for angles bigger than  $90^\circ$  should be used 2 pieces.

ELECTRIC SYSTEM FOR BIRD CONTROL
