

QUADRASAN®

Purge - Urinal Trap Treatment

PRODUCT INFORMATION

-  **Helps to clear blockages,** Quadrasan® Purge sachets are designed to help unblock urinals and shower block cubicles by breaking down organic waste and releasing enzymes.
-  **Contains active powders,** a biologically concentrated formulation designed to deal with waste products.
-  **No adverse effects,** all ingredients are biodegradable and have no adverse effects on the operation of treatment plants. Bleaches and disinfectants are not recommended for use with this product.
-  **Reduce odours,** by degrading the waste, helping to remove organic materials and prevent depository build up that causes unpleasant odours in toilets, urinals and shower cubicles.
-  **Safe to use,** Quadrasan® Purge is completely safe to use with no special handling requirements.
-  **Immediate improvements** after treatment.

Product

Quadrasan® Purge x24 [QUA-QPU]

How to use

Directions for use:

Simply place into urinal bowl or shower outlet and pour 500ml of water over the sachet. Bag will dissolve and the solution will follow the drainage path, creating a "frothing" action as the sachet starts to react. A slightly unpleasant odour will occur initially, which will indicate the acids are working to break down the organic waste.

Directions for use: Leave the sachet for 15 minutes.

Do not remove or touch the sachet for a minimum of 15 minutes.

Specifications

Quantity

24 sachets per case.

Weight

50g (+5%) sachet

Directions for use

Pour on 500ml of water to dissolve the sachet and leave for 15 mins.

Storage

Store in a cool dry place.
