

CONCENTRATED DETERGENT IN WATER SOLUTION.

Concentrated detergent in water solution for the control of fungi, algae, bacteria and viruses

## COMPOSITION

100 grams of product contain:

DIDECYLDIMETHYLAMMONIUM CHLORIDE g 4,5

Non-ionic detergents, chelating substances and water to taste to g 100

Contains: Oxo ethoxylated branched alcohols.

## CHARACTERISTICS

Some important features of COLSEPT are:

- has a biocidal activity on gram negative bacteria, fungi, algae, viruses, superior to any other quaternary compound, including Benzalkonium Chloride;
- tolerance towards anionic substances;
- compatibility with hard water;
- tolerance to organic substances.

## APPLICATION

COLSEPT is indicated for the disinfection and cleaning of floors, walls, sanitary equipment, in houses, in hospitals, gyms, communities and in the non-food industries.

For the disinfection and cleaning of hard surfaces, floors, walls, various equipment, we recommend using COLSEPT diluted in 0.5% water (50 g in 10 l of water). One liter of mixture thus obtained is sufficient for 5 - 10 m<sup>2</sup> of surface.

The minimum contact time for a complete disinfection is 5 minutes.

## PACKAGING

5 liter can
