

## RISTORAT COMBI

TAMPER RESISTANT BAIT STATION WITH ANCHORING PLUGS

A single monitoring tool for rodents and insects

### AGAINST

House mouse (*Mus musculus*), Brown rat (*Rattus norvegicus*), Black rat (*Rattus rattus*), cockroaches

### CHARACTERISTICS

**RISTORAT™ COMBI** has been designed to offer a station able to satisfy all PCOs needs. It is at the same time a multifunctional and multi-species station and a single monitoring tool for rodents and insects.

- Cover with snap closing and key opening: the two operations can be performed easily with a single hand
- To fix it at the structures you only need the two plugs (included)
- To install the station, it is possible to drill the surfaces without taking difficult measurements, simply using the station as a guide
- To fix it to a pole, you may use the special stainless steel band (not included)
- It is possible to remove the station with a simple and quick operation
- The rounded cover and its glossy finish help the clearing and avoid accumulation of dust.

It is available in two versions:

**RISTORAT™ COMBI BLACK** cover, where the rodent can quietly assume the bait.

**RISTORAT™ COMBI TRANSPARENT** cover, allowing to check the bait consume or the catch in the traps inside the station, without opening it and saving labour time

### TECHNICAL INFO

#### MATERIAL

Polypropylene

#### DIMENSION

18X16X15 (h) cm

TOOL FOR RODENTS AND INSECTS

# RISTORAT COMBI

A SINGLE MONITORING TOOL FOR RODENTS AND INSECTS

**RISTORAT™ COMBI HAS BEEN DESIGNED TO OFFER A STATION ABLE TO SATISFY ALL PCOS NEEDS**

**IT IS AVAILABLE IN TWO VERSIONS:**

**RISTORAT™ COMBI BLACK COVER**

where the rodent can quietly assume the bait.

**RISTORAT™ COMBI TRANSPARENT COVER**

allowing to check the bait consume or the catch in the traps inside the station, without opening it and saving labour time

## RISTORAT™ COMBI BAIT STATION

Includes a removable bait container that may contains blox as well as loose baits.  
The inner bait container is positioned at a higher level (2 cm) than the station base and the ramp driving the rodent to the bait has a edge that avoid that bait residues could been spread around.

The inner bait container can accomodate a special designed insect glue trap.

## RISTORAT™ COMBI MONITORING STATION

Simply remove the inner bait container and the transformation is done: the flat internal surface of the station can accomodate glue or snap traps for rodents and glue traps for insects.

Cover with snap closing and key opening: the two operations can be performed easily with a single hand

To fix it at the structures you only need the two plugs (included)

To install the station, it is possible to drill the surfaces without taking difficult measurements, simply using the station

To fix it to a pole, you may use the special stainless steel band (not included)
