

# ecoShell®

Universal Non-Aerosol Air Freshener

## PRODUCT INFORMATION

-  **Science made simple**, can be fitted easily and quickly to almost any surface using one of two fixings - a clip & sticky pad (both fixings provided for user preference) with no difficult programmable settings.
-  **Child resistant fragrance core**, with no small fragrance parts within the EcoShell® inner fragrance core, such as beads or liquids, that can otherwise be a choking hazard.
-  **Suitable for multiple locations**, EcoShell® can be used in a variety of different applications, such as hotel bedrooms, air conditioning vents, homes, offices, etc. and enhances the surrounding environment.
-  **Superior scent**, EcoShell® can provide superior scenting due to a large internal refill surface area.
-  **Clip and go, clip and throw™**, the revolutionary design allows the user to use the same fitting for every dispenser used. To replace EcoShell®, the user simply replaces the dispenser with a brand new version using the same fixing.
-  **Just natural airflow needed**, EcoShell® is a fragrance system made from flexible EVA that requires just natural airflow to work, without batteries or power. It is liquid and leak free and is a non-aerosol scent system.
-  **Recyclable**, using no external power source or propellants.
