

CYMINA SUPER

CYPERMETHRIN • PRALLETHRIN • PIPERONYL BUTOXIDE

Emulsifiable concentrated liquid insecticide

PESTS

flies, wasps, mosquitoes, cockroaches, ants, ticks

CHARACTERISTICS

Cymina Super is an emulsifiable concentrated insecticide based on cypermethrin and prallethrin synergized with piperonyl butoxide which give the product rapid killing and prolonged residual action.

Cymina Super is indicated for the treatment of indoor and outdoor environments, both civil and industrial. It is used in urban agglomerations, suburban areas, tourist villages, campsites, homes (including cellars, garages and storage rooms), shops, public and private buildings, schools, kindergartens, barracks, cinemas, theaters, canteens, hotels, restaurants, kitchens, bars, hospitals, nursing homes, retirement homes, warehouses and deposits of food substances, environments and industrial areas (food, paper, textile, tobacco factories), waste deposits, means of transport (ships, trains, buses).

Furthermore, the use of **Cymina Super** is recommended for the treatment of green areas, tree-lined avenues and city parks, bushes and hedges, lawns, ornamental plants for the sole control of mosquitoes.

APPLICATION

Cymina Super is used at the following doses:

- 1% (100 mL in 10 L of water) against mosquitoes and tiger mosquitoes, ants, ticks;
- 1 - 2% (100 - 200 mL in 10 L of water) against flies and cockroaches; depending on the type of surface and the degree of infestation, repeat the treatment after 1 or 2 weeks;
- 2% (200 mL in 10 L of water) against wasps.

One liter of solution is suitable for the treatment of 15 square meters of surface.

PACKAGING	
	2 can (5 l)
	box with 4 bottles (1 l each)
